TRANSPORT STATISTICS IN THE UNITED STATES - 1994

PREFACE

The tables set forth in *Transport Statistics in the United States* are compiled from reports filed with the Commission by railroads and motor carriers. This issue covers the reports for calendar year 1994.

This is the forty-first issue of *Transport Statistics in the United States*, superseding *Statistics of Railways in the United States* which was published yearly by the Commission from 1887 to 1953, inclusive. *Transport Statistics in the United States* also replaces two other publications, *Summary Tables of the Annual Report on the Statistics of Railways in the United States* and *Preliminary Abstract of Railway Statistics*. The present form of publication permits easy assembly of parts and portions desired in a standard loose leaf binder. When complete, *Transport Statistics in the United States* consists of the following two parts:

Part I - Railroads

Part II - Motor Carriers

Each part of *Transport Statistics in the United States* is issued separately. This document contains data for the class I railroads. Data for motor carriers are issued in two separate releases.

Additional copies of this document may be obtained at no charge by sending a request to:

## TRANSPORT STATISTICS IN THE UNITED STATES - 1994

### PART I: RAILROADS

#### INTRODUCTION

This report contains operating and financial data for the nation's class I railroad companies in operation as of December 31, 1994. Class I railroads are defined as railroads earning adjusted annual operating revenues for three consecutive years of \$250,000,000 or more. Railroads with less than \$250,000,000 revenues are classified as either class II (\$20,000,000 to \$250,000,000 revenues) or class III (less than \$20,000,000 in revenues). Class II and class III railroads are exempt from filing reports with the ICC.

The railroad portion of *Transport Statistics in the United States* is in the same format as the 1993 edition.

The districts to which the railroads have been assigned for statistical purposes are shown in the following map. In those cases where operated mileage does not fall solely within a single district, assignment of the carrier is made on the basis of location of the major portion of the carrier's operations.
